

Kool-Aid Bubbles!

Materials:

- Dish soap
- Water
- Kool-aid packets
- Bowl or pan (disposable will make cleanup easy!) OR an outdoor water table
- Straws

Directions:

- In the container of your choosing, combine the desired amount of water with a packet of Kool-aid.
- Mix together with your hand.
- Then add a large squirt of dish soap and stir together.
- Let the kids use the straw to blow bubbles in the pan!
- You can discuss how the air they are blowing into the pan is being trapped by the soapy water and when it gets to big, it pops! The soap helps with this elastic property and the Kool-aid smells good too!
- If you have an outdoor water table, this would be a good alternative to a smaller pan in the house!
