

Virtual Engineering Weekend 2021

Have you ever wondered who makes sure our buildings, roads, and bridges are safe? An engineer, that's who! Join a Whitaker Center educator to learn all about engineering, work together to design different bridges, and examine their structure and form. A recording of the program will be available after the program if individuals are not able to tune into the live session.

Materials:

- 20-30 toothpicks, craft sticks, plastic straws, or pencils
- 1 sheet of plain paper
- A few small toys or coins
- Books or building blocks that you can stack
- Tape
